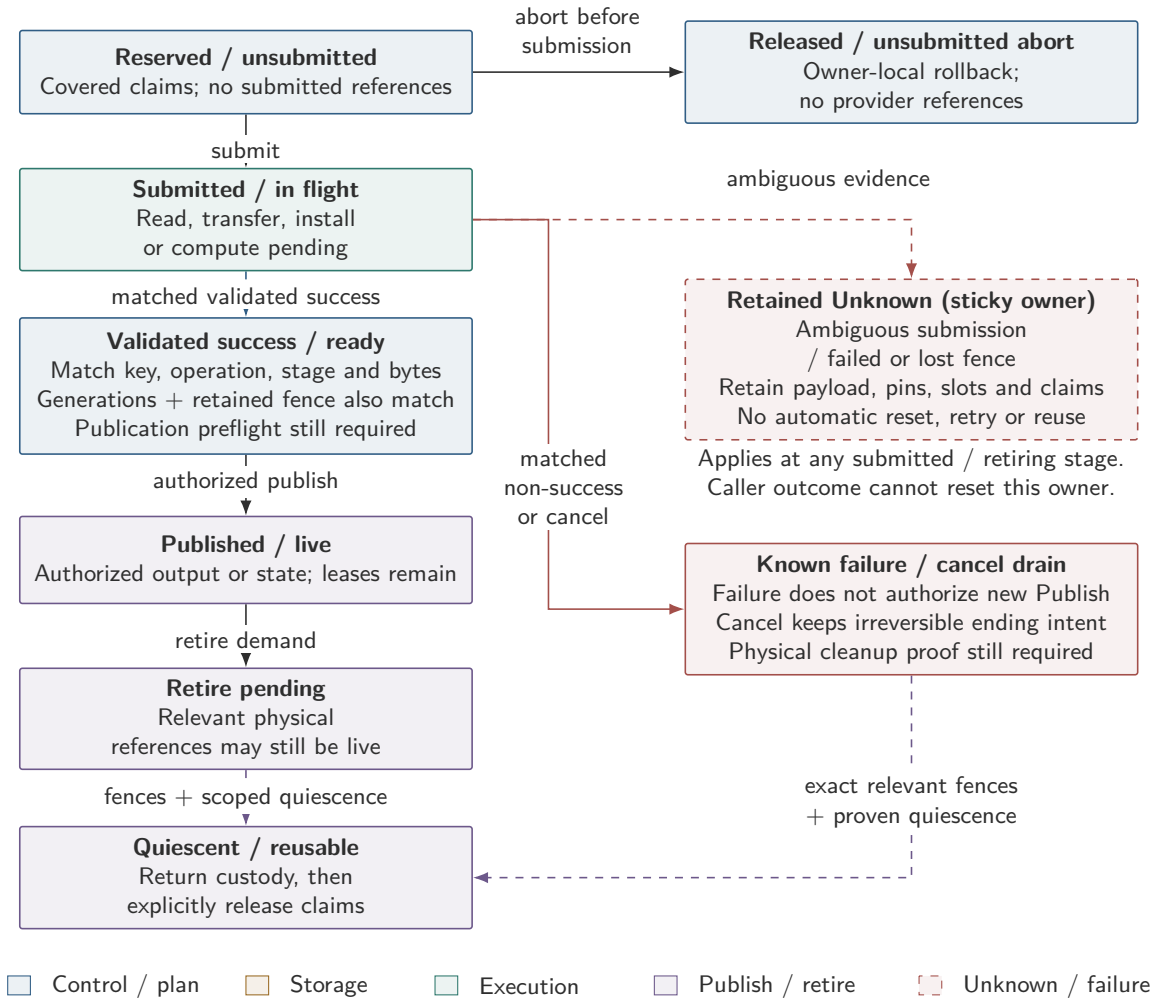
OPERATION / CUSTODY STATE (CONCEPTUAL)



Separate axes: logical outcome, operation phase and resource-credit kind are not interchangeable.
Solid: dependency / known outcome. Dashed: evidence; dashed Unknown border marks uncertainty.
Stale-generation or mismatched events are rejected: no state mutation or credit return.
Exact stage completion may close a registry obligation without healing a separately poisoned owner.
Producer readiness is not retirement; idle leases do not evict resident bytes; quiescence is not a refund.
