CUSTODY
Each claim stays charged until its own explicit release or ownership transfer.
Producer completion establishes readiness, not downstream retirement.
Quiescent
Release /
lease idle
Control / plan

Publish / retire
Unknown / failure
Logical terminal ≠ physical closure. Cancel, error, timeout and shutdown are not fences.
Pending retains its pollable payload; sticky physical-owner Unknown has no automatic reset or reuse.
Solid arrows show dependencies; dashed arrows require named evidence. Journals are not durable ACID.
